

[Hipster, Please!](#) invited The ECC to participate in their [Old Nerdy Bastard](#) compilation project, where the vocal tracks from various geeky songs are remixed and reworked by other geeky music types. The ECC chose

[Jonathon Coulton's "Code Monkey"](#);

, and got to try a new mashup concept. The final result mixes Coulton's vocals over samples from 30 other songs and bands (in only 2 minutes and 40 seconds!), and the samples were meticulously picked to match the chord progressions of the original track. The result is a choppy yet in-tune track that almost makes the listener dizzy with its fast pace. We're pretty proud of this one! Listen for yourself:
