

ALBUM RELEASE!

What would happen if mashup masters [The Bran Flakes](#), [The Evolution Control Committee Productions](#), and [Go Home](#) were set loose in the audio archives of the legendary [Raymond Scott](#) with a blank check to sample anything and everything -- from his 1930's cartoon jazz to his 1960's electronic experiments to unreleased studio recordings?

The answer is [Raymond Scott Rewired](#), an album of remixes and mashups of everything Raymond, produced by [Irwin Chusid](#), handler of the Raymond Scott estate and legendary WFMU DJ. The Bran Flakes, ECC, and GHP contribute **6 songs** *each* and jointly collaborated to create their cover version of Scott's signature tune **Powerhouse** for the album's finale.
