

[Burning Man](#) . wtf?

We get asked about it a lot, mostly by our non-California peeps. This plucky little festival in the Nevada desert has attracted **tens of thousands yearly**. The ECC has performed and/or broadcasted there every year since 2000. In San Francisco, it's **ubiquitous**.

Elsewhere on the west coast, merely **notorious**.

East of the Mississippi,  
**almost unheard of**.

What a shame. The short version: art, music, and freaks combine into one of the **best parties in the world**. ☐

And in that world everyone is a participant -- no spectators! -- so jump right in and BE the artist, the pirate, the neon bunny rabbit, or whatever you've always wished you could be.

**"Radical self-expression"**,  
as they like to call it.

But why should a bunch of jaded west coasters get all the fun? The better move: Steal It! Take that do-it-now energy away from there and **start something yourself**, ☐ *outside* of Burning Man. That's what inspired Gary Xaoui and I (TradeMark G.) to do our Burning Corn event 10 years ago. And it's what inspired the
